Summary

Full-Stack Developer and BCA student experienced in building **scalable web applications** using **React, Node.js, and MongoDB**. Proficient in **backend API development, responsive UI design**, and applying **data structures and algorithms** to solve real-world problems. Developed and deployed systems handling **500+ users** with focus on **performance** and **clean architecture**.

Skills

Languages: JavaScript (ES6+), TypeScript, C++, Java, Python, C

Frontend: HTML5, CSS3, React.js, Next.js, Redux Toolkit, React Router, Tailwind CSS

Backend: Node.js, Express.js, RESTful API Design, JWT Authentication

Database: MongoDB, MySQL, PostgreSQL, Firebase Firestore

Tools & Platforms: Git, GitHub, Vercel, Netlify, AWS (EC2, S3), Render, Docker

Concepts: Data Structures & Algorithms, Object-Oriented Programming (OOP), System Design Basics

Education

Graphic Era Hill University, Haldwani

2024 – 2027

Bachelor of Computer Applications (BCA)

CGPA: 7.5/10

Experience

- **Engineered scalable full-stack applications** using MERN stack, supporting **500+ users** and reducing load time by **30%** through optimized component rendering and API efficiency
- **Designed and optimized RESTful APIs** using Node.js and Express.js, improving response time by **20%** via efficient query handling and middleware structuring
- Implemented **secure authentication and authorization** using JWT with **role-based access control**
- Built and deployed **production-grade applications** with responsive UI and modular architecture
- Delivered **end-to-end full-stack solutions** in hackathons within **24–48 hours**
- Applied **clean architecture principles** for scalability and code reusability

Projects

Online Code Runner System

React, Node.js, Express.js, MongoDB

Engineered a **multi-language code execution platform** handling **200+ concurrent requests** with response time <200ms. Designed **scalable backend systems**, secure APIs, and efficient execution pipeline.

Resume Builder Platform

React, TypeScript, Tailwind CSS

Developed a **production-grade system** supporting **1000+ resume generations** with optimized state management, improving efficiency by **30%**.

SmartRoute – Optimized Delivery Routing & Time Prediction

React, Node.js, Express.js, MongoDB

Built an **delivery optimization system** using **graph algorithms (Dijkstra)** and real-time data processing. Optimized routing logic and backend APIs, improving efficiency and reducing latency. Architected a scalable full-stack system for real-world logistics scenarios.

Hackathons & Achievements

- Competed in **4+ national-level hackathons**, including Pan-IIT AI/ML Hackathon (IIT Guwahati)
- Participated in **Smart India Hackathon 2025**, building full-stack solutions in team environments
- Developed applications within **24–48 hours** under competitive conditions
- Solved **250+ DSA problems** on LeetCode focusing on graphs and dynamic programming
- Strengthened **problem-solving and backend system design** through consistent practice
